

GALE

Generative AI LLM platform for enterprises.

Zero Shot Method

Asking model, a question without any specific examples. The model uses the pretrained knowledge to respond

Few Shot Method

Asking model, a question by giving it a few specific examples. The model uses the pretrained knowledge and the examples provided to respond.

Fine Tuning Method

Tuning the base model with many examples and then using the model to predict outcomes of a given prompt.

Why train your own LLM?

There are many reasons to train your own LLM including data privacy, security and control over output.
